**THE PENNSYLVANIA STATE UNIVERSITY**  
**EROSION AND SEDIMENTATION CONTROL INSPECTION LOG SHEET**

The E&S plan contains a maintenance program which provides for inspection of BMPs (Best Management Practices such as silt fence, sediment basins, etc.) on a weekly basis and after each measurable rainfall event, including the repair of BMPs to ensure effective and efficient operation. The maintenance program for both the temporary and permanent erosion and sediment control BMPs, including disposal of materials removed from the BMPs or project area, has been included in the narrative. The type of maintenance, such as cleanout, repair, replacement, regrading, restabilizing, etc. for each of the BMPs is included in the plan. **NOTE: This inspection report must be kept up to date and will be reviewed by the Conservation District and/or Penn State Representatives regularly.**

| INSPECTION DATE | INITIALS | RAINFALL OR WEEKLY | LOCATION OF E&S CONTROL MEASURE | CONDITIONS NOTED | CORRECTIVE MEASURES TAKEN |
|-----------------|----------|--------------------|---------------------------------|------------------|---------------------------|
|                 |          |                    |                                 |                  |                           |
|                 |          |                    |                                 |                  |                           |
|                 |          |                    |                                 |                  |                           |
|                 |          |                    |                                 |                  |                           |
|                 |          |                    |                                 |                  |                           |
|                 |          |                    |                                 |                  |                           |
|                 |          |                    |                                 |                  |                           |
